

Iowa Medicaid Data Systems

IABC - Iowa Automated Benefits Calculator. The integrated eligibility system identifies a unique member ID. Financial information is captured. The system will be replaced on October 1, 2013 with ELIAS.

ISIS – Individualized Services Information System. ISIS contains workflow and case management for long term care and home and community based services.

MMIS – Medicaid Managed Information System. The MMIS system manages provider enrollment, managed care, processes claims and makes payments to providers. Claim information generally includes diagnosis and procedure information. The current MMIS system will be replaced February 1, 2015 by MIDAS.

A/R County Billings

- Tracks services charged back to the counties.

Data Warehouse

- 10 years of claims history
- Encounter data from Magellen (Iowa Plan Behavioral Health) and Meridian (Managed care)

Disease Management

- Data mining from claims for program eligibility

Program Integrity

- Data mining for service utilization review
- Predictive modeling and population/member health risk scoring

Onbase - Imaging and Workflow

- Member / provider imaging
- Workflow for reviews
